

TIM FOX

Principal Network Engineer | Network Infrastructure Leader

United States | Open to Remote Roles | timfox2025@tim.army | tim.army

PROFESSIONAL SUMMARY

Principal Network Engineer and technical leader with more than 20 years of military, academic, and professional technology experience supporting mission-critical enterprise, data center, healthcare, and federal environments. Leads engineers, develops technical talent, produces architecture and design documentation, and delivers multi-vendor infrastructure across Cisco, Juniper, Palo Alto Networks, F5, Gigamon, Dell, VMware, Red Hat, and Linux platforms. Combines hands-on expertise in routing, switching, network security, IPv6, encrypted communications, data center technologies, and network modernization with an MBA and a sustained record of technical mentorship.

CORE COMPETENCIES

- **Network Engineering:** BGP, OSPF, MPLS, IPv4, IPv6, VLANs, access control lists, routing, switching, network architecture, implementation, troubleshooting, and Tier 3 support.
- **Network Platforms:** Cisco IOS, IOS-XE, IOS-XR, Catalyst, ASR, Cisco ACI, Cisco APIC, Cisco 1001-X, Cisco 8000v, and Juniper JUNOS.
- **Security and Traffic Management:** Palo Alto Networks, F5, TACLANE, Gigamon, network segmentation, encrypted communications, IPv6 security policies, and firewall engineering.
- **Data Center and Systems:** Dell servers and switches, Dell VxRail, VMware, virtualization, Linux, Red Hat Enterprise Linux, load balancers, and packet brokers.
- **Leadership and Delivery:** People management, technical mentoring, team development, technical training, architecture documentation, design reviews, implementation planning, project leadership, stakeholder communication, and operational support.

CERTIFICATIONS

Advanced Networking

- Cisco Certified Network Professional - Enterprise.
- Cisco Certified Network Associate.
- Juniper Networks Certified Associate - Junos.

Cybersecurity

- GIAC Certified Enterprise Defender.
- CompTIA Security+ CE.
- Fortinet Certified Associate in Cybersecurity.

Cloud, Virtualization, and Data Center

- AWS Certified Cloud Practitioner.
- Dell VxRail Deploy Version 2.
- VMware Certified Associate - Data Center Virtualization.

DoD Workforce Qualification Alignment: DoD 8570 IAT II and IAT III; DoD 8140-aligned qualifications.

PROFESSIONAL EXPERIENCE

LEIDOS INC.

Supervisor / Principal Network Engineer | March 2026-Present

- Lead and develop 2 direct reports within a growing infrastructure engineering team of approximately 12 professionals.

- Provide technical training and knowledge transfer covering Dell servers, Red Hat Enterprise Linux, Juniper routers, and Cisco routing and switching platforms.
- Remove technical and operational blockers by coordinating equipment, access, documentation, training, and cross-team assistance.
- Support employee development, team readiness, operational success, and positive team morale through hands-on leadership and mentoring.
- Provide senior technical guidance for complex network and infrastructure issues across multi-vendor environments.

FEDITC

Senior Network Engineer | July 2025-March 2026

- Co-designed classified and unclassified network architectures supporting Air Force aircraft communications.
- Translated mission, security, availability, and interoperability requirements into deployable technical designs.
- Conducted pre-release testing of TACLANE encryption equipment and documented operational findings, interoperability risks, and deployment considerations.
- Delivered Tier 3 engineering support for the Executive Aircraft Communications Network.
- Resolved complex routing, switching, firewall, and virtual-network issues in a mission-critical environment.
- Supported Cisco 1001-X, Cisco 8000v, additional IOS-XE routing and switching platforms, and Palo Alto Networks firewalls.

AKIMA / TUNDRA LLC

Senior Deployment Network Engineer | April 2024-July 2025

- Authored, reviewed, and submitted network designs, implementation plans, test procedures, and technical documentation aligned with customer, engineering, security, and acceptance requirements.
- Planned, installed, configured, and validated Cisco, Dell, and VMware infrastructure, including enterprise switches, servers, and virtualized platforms.
- Improved team capability through technical mentoring, demonstrations, deployment guidance, and reusable engineering documentation.
- Equipped team members with the technical knowledge needed to perform deployments and troubleshoot multi-vendor infrastructure.
- Coordinated deployment activities across engineering teams, customer stakeholders, and onsite personnel to reduce implementation risk and support successful acceptance.

MSM TECHNOLOGY INC.

Senior Data Center Network Engineer | November 2022-March 2024

- Engineered and supported data center infrastructure spanning routers, switches, firewalls, load balancers, packet brokers, and Cisco ACI environments.
- Provided engineering support for complex configurations across multi-vendor enterprise and data center networks.
- Served as a technical consultant across Cisco APIC, Cisco IOS-XE, Juniper JUNOS, F5, and Gigamon platforms.
- Designed and implemented IPv6 access control lists to strengthen network security enforcement and support IPv6 adoption.
- Developed technical documentation and training materials to improve knowledge transfer and team troubleshooting capability.
- Mentored team members through technical training, demonstrations, and engineering documentation.

LEIDOS INC.

Lead Infrastructure Network Engineer | November 2019-November 2022

- Led engineering support for multi-vendor infrastructure incorporating Cisco IOS-XR, Cisco IOS-XE, Juniper, F5, Gigamon, Linux, firewalls, load balancers, routers, switches, and servers.
- Served as a senior escalation resource for BGP, OSPF, MPLS, static routing, traffic management, and network availability issues.
- Provided engineering support for router, switch, firewall, load balancer, and server configurations.

- Advised engineering and operational teams on design decisions, configuration changes, troubleshooting strategies, and implementation risks.
- Produced technical documentation and delivered informal training that strengthened team readiness and knowledge transfer.
- Mentored team members through impromptu technical training, demonstrations, and documentation.

BJC HEALTHCARE

Senior Cisco Network Engineer Subject-Matter Expert | July 2017-January 2019

- Served in a lead engineering role for a \$9.7 million hospital network modernization initiative.
- Supported network architecture, implementation, migration, validation, and technical coordination for the hospital upgrade.
- Engineered and supported Cisco routing and switching infrastructure serving 2 hospitals and more than 40 clinics.
- Supported Cisco 2921 routers and Cisco Catalyst 9410 and 4510 switches across a highly available healthcare environment.
- Mentored engineers and project managers on technical dependencies, implementation risks, and network requirements.
- Served as a Cisco network engineering subject-matter expert for enterprise healthcare infrastructure.

LEIDOS INC.

Senior Network Engineer Subject-Matter Expert | July 2016-July 2017

LOCKHEED MARTIN

Senior Network Engineer Subject-Matter Expert | March 2016-July 2016

Position continued without interruption after the supporting contract transitioned from Lockheed Martin to Leidos.

- Supported Defense Information Systems Agency Joint Regional Security Stack engineering and operations as a senior network subject-matter expert.
- Provided engineering and technical support in a complex, multi-vendor defense environment.
- Advised cross-functional teams on Cisco, Juniper, Palo Alto Networks, F5, Gigamon, and Linux technologies.
- Engineered and troubleshoot BGP, OSPF, MPLS, and static-routing configurations across mission-critical infrastructure.
- Supported Cisco IOS, IOS-XE, and IOS-XR routing and switching platforms.
- Delivered technical training and senior-level troubleshooting support to engineering and operations teams.
- Served as a senior team contributor and trainer supporting DISA JRSS and its customers.

EDUCATION AND TECHNICAL DEVELOPMENT

Full-Time Education and Career Development | 2006-2016

- Pursued higher education and technical development while transitioning from military service to civilian network engineering.
- Earned associate and bachelor's degrees focused on information systems, computer networking, systems administration, cybersecurity, and enterprise infrastructure.
- Developed hands-on routing, switching, systems administration, and network security skills through formal education and technical lab work.

UNITED STATES ARMY

Information Technology Specialist | April 1999-March 2006

- Managed 2 Internet cafés supporting 25 computers each and sustained 100% service availability.
- Administered 2 Cisco routers, 1 Cisco switch, specialty fiber-optic cabling, and communications equipment for 2 years.
- Served as a Windows domain administrator and provided technical support for approximately 800 users in a team environment.
- Contributed to the successful deployment of the Defense Messaging System, an encrypted email capability, in Germany.
- Earned formal recognition for successful completion of the Defense Messaging System deployment project.
- Supported network, systems, end-user, and communications requirements in military operational environments.

EDUCATION

WEBSTER UNIVERSITY

Master of Business Administration | March 2025

- Coursework included business and financial analysis, accounting, business strategy, and Securities and Exchange Commission filings.

MICHIGAN TECHNOLOGICAL UNIVERSITY - Houghton, Michigan

Bachelor of Science, Computer Networking and Systems Administration | 2011-2014

- Coursework included project management, Cisco enterprise networking, network security engineering, Linux administration, and Windows Server administration.

JEFFERSON COMMUNITY COLLEGE - Watertown, New York

Associate of Applied Science, Computer Information Systems | 2007-2010

- Completed foundational studies in information systems, computer networking, systems administration, and technical support.

PROFESSIONAL DEVELOPMENT

- CCIE Enterprise Infrastructure Advanced Training, Micronics Training | December 2025.
- AWS Certified Cloud Practitioner Essentials, Amazon Web Services | May 2025.
- Dell VxRail Installation and Implementation Training | October 2024.
- CCIE Routing and Switching Advanced Training, Micronics Training | February 2017.
- Developing the Leader Within Workshop, Atlanta, Georgia | August 2006.
- Studied the five levels of leadership as a framework for leadership development and organizational success.

TECHNICAL LAB

- Maintain and continuously expand a multi-vendor infrastructure lab incorporating Cisco routers and switches, Dell VxRail servers, virtualization technologies, and network security appliances.
- Use the lab to strengthen hands-on engineering, configuration, troubleshooting, integration, testing, and technical development skills.
